# Denise Langer

Java Software Developer en Globant  
Argentina

## Extracto

My work experience in different positions has led me to improve how to provide the best possible experience for the client or user. I think it's extremely important to always be able to gain new knowledges and skills. Also these experiences not only gave me individual growth, but a facility and project objectives with teamwork. I am very responsible with the activity to be carried out and with my work environment too. I am actually studying the programming career in UTN and I also learn by my self about technology with E-Learning platforms constantly.

---
